RedPort Global Features

VoIP: Multi-VoIP, Prepaid & postpaid, low-bandwidth, high-quality, high efficiency

Email: Powerful business email with onboard server and high efficiency

Cyber Security: Powerful spam and malware detection and removal

Satellite Routing: Multi-WAN configuration for failover, OBM and least-cost routing

Vessel Tracking: Track the vessel position at all times

Firewall & Filtering: Control every aspect of your network for maximum performance

All system features are remotely managed from an onshore web portal, centralizing the IT management fleet-wide.

RedPort Global

The world's leading independent satellite services provider, RedPort makes the products and services that let you make the most out of satellite airtime on a turnkey basis.

SMS Global

CrewCommCenter is one of the most popular crew communication systems in the maritime industry. Now it's available to more vessels than ever with its availability on RedPort routers.

Optimizer Personal

Single-user satellite Wi-Fi router; works with XGate app for smartphones, tablets or computers

Optimizer CrewComm

Multi-user VoIP gateway, PBX and Wi-Fi router for small vessels

Optimizer CrewComm Premier

Multi-user VoIP gateway, PBX and Wi-Fi router. Captive portal and preconfigured business and crew networks make it simple to control vessel operations and support crew welfare

Optimizer CrewComm Enterprise

Our most powerful platform. Optimizer CrewComm Enterprise does it all and meets the most demanding requirements of broadband terminals with hundreds on board
